### The HeartShare Difference

When a member of the family is infected with HIV or AIDS, daily living routines can become overwhelming and difficult to handle. At HeartShare, we focus on keeping individuals healthy longer, thereby keeping the family together longer. We help families recognize their own strengths and abilities and support them when needed.

### Our Programs

Individuals and families affected by HIV/AIDS often do not know the full range of services available to them. At HeartShare, we help them understand what options are available and assist with day-to-day living situations.

#### COMMUNITY FOLLOW-UP

HeartShare's supportive and dedicated staff provides family-centered case management services. By increasing access to HIV-related services, we can help to prevent or delay unnecessary crisis in your life.

We use a team approach with a specially-trained case management staff to develop a comprehensive plan, advocate for needed services offered by other providers, and obtain consistent and ongoing access to medical care.

#### RESIDENTIAL SERVICES

Our Residential Housing Program helps individuals and their families find and

maintain comfortable living arrangements that best meet their needs. HeartShare has a strong reputation for having clean, well maintained, and safe homes.

Each situation is unique. Our staff works hard to locate an available apartment or house that best meets the needs of our residents. Once

housing issues are resolved, individuals and their families are able to focus on obtaining medical care, finding employment, and improving their family situation.

Additionally, to eliminate isolation, we maintain contact with individuals and their families, and arrange group trips and activities for individuals and their families.
